e-mail: info@fastautomation.it
Capital stock €750,000.00
VAT registration number 01306000355
Tax number 01130230368
Registered in chamber of commerce of Reggio Emilia n.163184
Registered in Reg. Company Court of Reggio Emilia n.16955
ISO 9001 Quality Certification

FAST S.p.A. has been operating in the industrial process management and automatic control areas since 1982, in different production sectors. Since the beginning, Fast has adopted the most modern technical solutions, and has distinguish itself for the punctual, kind and careful service toward the customer.

In all these years Fast has realised hundred of installations in Italy and abroad, for the most important companies operating in the industrial plants.

Design and supply of complete automation systems.

Control rooms and electric control boards, electric installation and plant start-up.

PLC, DCS & ESD software development and configuration.

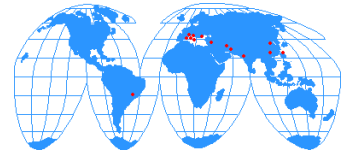

SCADA, OPC and Management software.

PC local networks and Networking, Web, Internet, Intranet.

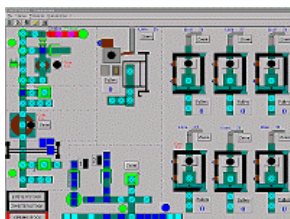

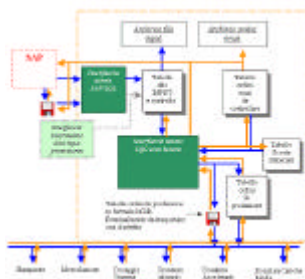

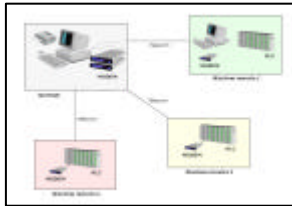

Management of plants by remote telecontrol and remote service.

Procedures and software for management decision support (MIS).

Documentation and training courses. Post-sales service.

The following areas and services are involved in our activities:

Industrial Software

Plant View SCADA and OPC Control System.

Environment

Remote control of plants remotely located. Water monitoring and data management systems. Depuration plants. Waste water treatment plants. Urban and special waste incinerators.

Ceramics

Raw material mixing and dosing plants. Porcelain gres plants. Collection and management of production data. Store uploading/downloading and handling management in radio-frequency. Ceramic dye works.

Chemicals

Polymerisation, conveying and stocking plants. Production of polymers, plastic films, polyester, rubber, paints, etc. Technological fibre production plants.

DCS & ESD configuration

Plants controlled by DCSs manufactured by the most important international companies of instrumentation. Software configuration, engineering, electrical boards and world-wide start up.

Logistics

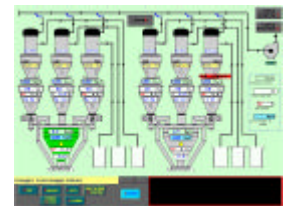

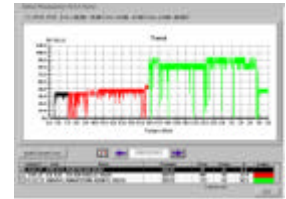

Computerised plants for robot control. Store uploading/downloading and handling management in radio-frequency.

Iron metallurgy

Integrated systems for management and production of special steels. Heat treatments. Smelting furnaces feeding and energy control.

Information Technology, e-business

Integrated systems between production and ERP management. Interface management to CED, As400, SAP, etc. Data management on Web Server and Internet.
